GENERIC LESSONS FOR IMPROVING THE TREATMENT OF RISK, UNCERTAINTY AND COMPLEXITY IN THE PLANNING OF MEGA URBAN TRANSPORT PROJECTS

Harry T. Dimitriou, Richard S. Oades, E. John Ward and Phil Wright
University College London

Contents

1. Introduction 1

2. Key concepts, ideas, issues and methods 1-5
   2.1 Definitions of risk, uncertainty and complexity (RUC) 1-2
   2.2 Relationships between RUC and representational paradigms 2-5

3. Advancing the future of MUTP planning practices 5-10
   3.1 Introduction 5
   3.2 Typical characteristics of MUTPs 5-7
   3.3 The MUTP life cycle 7-8
   3.4 The importance of MUTP context 9
   3.5 The need for a strategy 9-10

4. Transferable lessons for MUTPs 10-112
   4.1 Introduction 10
   4.2 Working Paper #2 10-54
     4.2.1 Military planning
     4.2.2 Earthquake engineering
     4.2.3 Banking project finance
     4.2.4 General insurance
     4.2.5 Agriculture
     4.2.6 Public health and medicine
     4.2.7 Corporate world – trust
     4.2.8 Corporate world – innovation
   4.3 Working Paper #3 54-103
     4.3.1 City systems - complexity and emergence
     4.3.2 Strategic and regional planning
     4.3.3 Transport policy – hypermobility
     4.3.4 Great planning disasters
     4.3.5 Property development – major projects
     4.3.6 Construction and project management
   4.4 Comparative analysis of findings 103-112
     4.4.1 Path dependency
     4.4.2 Innovation
4.4.3 Strategy
4.4.4 Governance, regulation and enforcement
4.4.5 Stakeholders, relationships, trust and transparency
4.4.6 Information, tools, techniques and experts

5. Conclusions 112-125
5.1 Risk management responses 112-114
5.2 Lessons for MUTPs 115-125

References 126-129

Appendices

Appendix 1: Table of contents of preceding Working Papers 130-131

Appendix 2: Comparative analysis and relevance of contributions in Working Papers #2 and #3 132-139
